Setu Marathe

Toronto, ON | setu.marathe@gmail.com | linkedin.com/in/setu | github.com/setumar

Education

Western University Sep 2024 – Apr 2028 (Expected)
Bachelor of Science in Computer Science, Minor in Data Science *London, ON*

- **Academics:** 3.9 GPA, Dean's Honour List, Western University Scholarship of Distinction
- **Coursework:** Introduction to Machine Learning, Databases I, Statistical Programming, Data Science
- **Involvement:** Computer Science Undergraduate Society, Sports Analytics Club, Judo Club

Experience

Data Analyst Intern Jul 2026 – Aug 2026
Van Luyk Greenhouse *London, ON*

- Designed a framework using NASA POWER data to assess 3 Canadian regions' suitability for specialty crops
- Modeled greenhouse operating costs from regional climate data to evaluate specialty crops' financial viability
- Presented findings and site recommendations to management to inform expansion strategy

Machine Learning Research Intern May 2026 – Aug 2026
Western University *London, ON*

- Built Gemini API pipelines to inject missingness via conditional probability tables and generate causal hypotheses
- Engineered a pandas pipeline computing missingness rates and indicator correlations to ground model reasoning
- Evaluated LLM causal hypotheses on finance and housing data, reaching ∼100% MCAR and 60% MAR accuracy

Software Developer Intern May 2025 – Aug 2025
CGI Inc. for BMO *Toronto, ON*

- Shipped customer-facing features for BMO's Small Business Banking App, used by more than 100,000 clients
- Partnered with developers and business analysts to translate client requirements into functional frontend solutions
- Built maintainable Angular (HTML, CSS, TypeScript) UI components following enterprise standards

Projects

UFC Fight Predictor | *Python, pandas, NumPy, scikit-learn, BeautifulSoup, Playwright, SQL* Oct 2026

- Built a web scraper to collect fight and fighter statistics from UFCStats into a SQL database
- Engineered over 200 features from fight history, including Elo ratings and logit-transformed betting odds
- Trained a logistic regression model on 5,000+ fights achieving ∼70% accuracy on 900+ held-out fight outcomes

Movie Review and Recommendation Site | *React, Python, Flask, scikit-learn, MongoDB* Nov 2025

- Developed a full-stack web application that enabled users to create accounts, browse, rate, and review movies
- Implemented a KNN recommendation engine trained on 10,000+ TMDB titles to improve user content discovery
- Built a React UI and Flask backend with MongoDB storage for user accounts, ratings, and reviews

Obstacle Detection Visualizer | *Python, NumPy, Vedo* Mar 2025

- Created a 3D visualization tool to interpret machine learning predictions from LiDAR scan data
- Processed and rendered point-cloud data using NumPy and Vedo to represent spatial obstacle analysis in real time
- Overlaid model predictions on true labels to visually identify misclassified obstacles

Awards

3rd Place – Western University Engineering Automotive Challenge Mar 2025
In partnership with General Motors and OVIN

1st Place – North Shore Hackathon Oct 2023
In partnership with 1Password and Axure

Technical Skills

Languages: Python, SQL, R, TypeScript, Java, C, Bash, HTML, CSS
Frameworks & Libraries: React, Angular, Flask, pandas, NumPy, scikit-learn, Matplotlib, BeautifulSoup, Playwright
Databases & Tools: MongoDB, Git, GitHub, JFrog, VS Code, IntelliJ, Gemini API
Certifications: Microsoft Office Specialist – Excel, Word, & PowerPoint
